# What is Mendeley

The best free way to manage your research

Organize, share, discover

- 1 Download Mendeley for free
- 2 Add all your PDFs
- 3 Organize, cite and collaborate...

**SIGN UP AND DOWNLOAD**

Available for Mac, Windows and Linux

# The Overview: Architecture

 MENDELEY

 MENDELEY  
INSTITUTIONAL EDITION POWERED BY SWETS

# Why are we using Mendeley

- Apart from just a tool and platform to aid our research work, we need **to seed and cultivate a habit in** creating knowledge awareness for our research.
- So that, our research will **harvest eyeballs, interests and lead** to the different type of citation metrics

# Plan your publication route

Published Copy

# Functions that you need to know:

## Reference Manager

Generate citations and bibliographies in Microsoft Word, OpenOffice, and LaTeX.

## Collaborate

Connect with colleagues and securely share your papers, notes and annotations.

## Read and Annotate

Open PDFs and capture your thoughts through sticky notes and highlights.

**Content-based recommendations:** The user recommended items similar to the one preferred in the past;

**Collaborative recommendations:** The user recommended items that people with similar preferences liked in the past;

## Backup, Sync and Mobile

Access your papers on the web, iPhone or iPad.

## Add and Organize

Import and organize PDFs from your computer, EndNote™, Papers or Zotero.

## Network and Discover

Discover papers, people and public groups.

**An End User Edition**

You can download via [Mendeley.com](https://www.mendeley.com)

# Getting started with Mendeley Desktop

- ◉ Before we get started, here are some terms you should be familiar with:
  - ◉ **Mendeley Desktop** : Mendeley Desktop is the downloaded part of the software installed onto your computer. [Download Mendeley Desktop](#) if you haven't already.
  - ◉ **Mendeley Web** : This is the Mendeley website where you can access the web version of your library, edit your profile and search for papers, groups or people.
  - ◉ **Sync** : The process of synchronizing your Mendeley data across devices.
  - ◉ **Web Importer** : The browser bookmarklet that lets you quickly import documents from anywhere on the web.
  - ◉ **Citation Plugin** : A plugin you can install that allows you to create and format your citations and bibliography according to your chosen style.

# A quick introduction to the interface

**MENDELEY**  
INSTITUTIONAL EDITION POWERED BY SWETS

Mouse over the markers below for a quick introduction to the interface.

**My Library** PDF Viewer

The screenshot shows the Mendely Desktop application window. On the left is a sidebar with navigation options like 'All Documents', 'Recently Added', and 'My Publications'. The main area displays a table of documents with columns for Author, Title, Year, Published In, and Added. A document by Masih, Prerna Ja. is selected. On the right, a detailed view of this document is shown, including its title, authors, journal information, and abstract. Blue circular markers with a '+' sign are placed over several UI elements: the sidebar, the document list, the search bar, and the document details panel.

**Mismatch Repair proteins are recruited to replicating DNA through interaction with Proliferating Cell Nuclear Antigen (PCNA)**

Authors: P. Masih, D. Kunnev, T. Melendy

Journal: *Nucleic Acids Research*

Year: 2008  
Volume: 36  
Issue: 1  
Pages: 67-75

**Abstract:**  
Mismatch Repair (MMR) is closely linked to DNA replication; however, other than the role of the replicative sliding clamp (PCNA) in various MMR functions, the linkage between DNA replication and MMR has been difficult to investigate. Here we use an in vitro DNA replication system based on simian virus 40, to investigate MMR recruitment to replicating DNA. Both DNA replication and MMR proteins are recruited to replicating DNA in an origin-dependent fashion. Primer synthesis is required for recruitment of both PCNA and MMR proteins, but not for recruitment of the single-stranded DNA-binding protein (RPA). Blocking PCNA recruitment to replicating DNA with a p21-based polypeptide blocks PCNA and MMR, but not RPA recruitment. Once PCNA and subsequent proteins r...

for interactive induction

# Adding your existing documents

Adding your existing documents is the best way to see how Mendeley can start saving you time.

## Drag and drop files or folders

Drag & drop files or folders into the open Mendeley window. This is great for quickly adding files to Mendeley. Recently added files can be found in the "Recently Added" folder in the left hand pane.

# Adding your existing documents

Adding your existing documents is the best way to see how Mendeley can start saving you time.

## Import from other software

1. Export from other software into RIS, BibTeX, PDF or EndNote XML file format.
2. Click File → Import and select the exported file.

You can transfer your library from EndNote™, Papers, Zotero, Refworks, Jabref and more.

# Adding your existing documents

Adding your existing documents is the best way to see how Mendeley can start saving you time.

## Add your publications

Drag papers you've authored into the My Publications folder on the left for them to be promoted via your Mendeley profile page.

Once added, other users can download the PDFs directly from your profile and your work can be seen by researchers worldwide.

# Finding and organizing your files

Find papers you're looking for and easily catalog documents based on your workflow.

## Search the full-text of your library

Search for a keyword in the top right to find documents instantly as you type. The search includes global notes and tags by default and you can filter specifically by clicking the filter arrow.

# Finding and organizing your files

Find papers you're looking for and easily catalog documents based on your workflow.

## Create folders & sub-folders

Right click anywhere in the left hand pane to create folders and sub-folders. You can drag and drop files into folders from anywhere.

**Tip:** We recommend starting with search to help find things fast. The real usefulness of folders is for reducing the scope of your search.

# Finding and organizing your files

Find papers you're looking for and easily catalog documents based on your workflow.

## Organize with tags

You can select a document and add tags in the right hand details pane and then search for tag names to find a group of documents easily.

Tags work much the same as folders, with the key differences being that it's easier to add lots of tags to a document than it is to drag it into several folder.

intermediate betaine, whereas in the alternative case, the C2 center was under Felkin Anh/Cornforth control through non-reversible formation of the betaine. Thus, the aldehyde stereocenter influenced the degree of reversibility in betaine formation, which impacted on the stereocontrol at the C2 position.

**Tags:**  
Measurement; Theory

**Keywords:**

# Read, search and annotate

The built-in PDF viewer allows multiple open documents, highlighting, post-it-like note taking and more.

## Open a document in the PDF viewer

Click the PDF icon or double click to open a document in the viewer. We've listed icons that you will come across below (no icon means no full-text is available).

-  Favorite document
-  Mark as read / unread
-  PDF available
-  PDF available for download

The screenshot shows a window titled "All Documents" with an "Edit Settings" button. Below the title bar is a table with columns "Authors" and "Title". The table contains several rows of document entries, each with a star icon, a dot icon, and a PDF icon. A mouse cursor is hovering over the PDF icon of the second row, which has a tooltip that says "Open File".

Star	Dot	PDF Icon	Authors	Title
☆	●	📄	Abrahams, S C	research papers Ferroe 3 family research paper
☆	●	📄	Tobias; Elmquist...	- Present Findings and I

# Read, search and annotate

The built-in PDF viewer allows multiple open documents, highlighting, post-it-like note taking and more.

## Keyword search a document

Search for a document keyword via the toolbar in the top right. Your keyword will be highlighted throughout the document which saves you time searching for specific words or phrases.

the laparoscopic camera by a plastic foil and scanning phantom with a CT imaging device. The visualization of **branches** registered with the phantom is separated into virtual planes. During the experiment the box is closed with a plate that consists of twelve holes for each **branch** used inside of the box. After the CT scan we defined 5 volumes, which are visualized as a sphere colored slightly different than the visualization of the **branches**.

## 2.3 Experiment

# Read, search and annotate

The built-in PDF viewer allows multiple open documents, highlighting, post-it-like note taking and more.

## Make your first note

Click on the Note button and click anywhere in the document to make your first note. These are useful for making quick notes as you read a paper and can be placed anywhere on the document.

You can make more detailed notes in the toolbar on the right hand side, which are searchable.

# Discover, add and import new content

Save content from around the web into your Mendeley account in just a few clicks.

## Discover with literature search

Select the Literature Search tab on the left hand pane to search and add papers from the Mendeley catalog. To add documents, simply click "Save" on the right hand pane or drag and drop articles to any folder or group that you're a member of.

**Tip:** [Advanced search operators](#) can help you refine your search.

# Discover, add and import new content

Save content from around the web into your Mendeley account in just a few clicks.

## Import content with the Web Importer

Save online content directly to your Mendeley account with the **Web Importer bookmarklet**. Import content from a wide range of sources and academic databases.

# Discover, add and import new content

Save content from around the web into your Mendeley account in just a few clicks.

## Auto-add documents with a Watch Folder

Setting up a Watch Folder in Mendeley is one of the most versatile ways of quickly importing documents. Simply drop PDFs in the folder and Mendeley will import them automatically for you.

To setup a Watch Folder:

1. Select the 'Watch Folder' option from the add files menu in the main toolbar and browse to the folder containing the documents you're interested in.
2. Mendeley will add each document to your library, scanning each one for useful details such as title, author and journal.
3. Any subsequent documents added to the folder will automatically be visible in Mendeley.

# Get started with the citation plugin

Quickly create and format your citations and bibliography according to your chosen style.

## What is the citation plugin?

The Mendeley citation plugin allows you to cite seamlessly without leaving your word processor. You can create a bibliography and all the references you add will automatically be added to the end.

The Plugin is compatible with Word, OpenOffice and Bibtex.

# Get started with the citation plugin

Quickly create and format your citations and bibliography according to your chosen style.

## Install the Citation Plugin

Make sure you have Mendeley Desktop open and goto 'Tools' in the main toolbar to click 'Install MS Word Plugin'. The Plugin is compatible with Word, OpenOffice or Bibtex.

# Get started with the citation plugin

Quickly create and format your citations and bibliography according to your chosen style.

## Installation success

You should see this screen which means the plugin is installed and you're ready to open Microsoft Word.

# Get started with the citation plugin

Quickly create and format your citations and bibliography according to your chosen style.

## Finding your citation style

Click View → Citation Styles → More Styles to search for citation styles on Mendeley. In the Get More Styles tab you can search for other styles e.g. "Harvard", "Imperial" or "Durham" and install them in one click.

Mendeley has thousands of styles from all the top journals and institutions worldwide.

# Get started with the citation plugin

Quickly create and format your citations and bibliography according to your chosen style.

## Citing a document from within your library

From the Mendeley citation toolbar you can automatically insert formatted citations or generate a bibliography for your paper. To generate citations in MS Word or Open Office you can [watch this video for a quick demo](#).

Word 2007

Word 2011

# Get started with the citation plugin

Quickly create and format your citations and bibliography according to your chosen style.

## Advanced: The Citation Style Editor

Start editing your own citation styles with the open source [Citation Style Editor](#), produced in collaboration with Columbia University Libraries.

To get started we recommend [this tutorial](#).

## 2. Type a citation in the style you require

### INLINE CITATION

(McInnis & Nelson, 2011)

### BIBLIOGRAPHY

McInnis, M. D., & Nelson, L. P. (2011). *Shaping the Book*

# Synchronize across devices

Mendeley Sync lets you synchronize your data across devices so access your research wherever you go.

---

## Why is Sync useful?

Sync makes it easy to get up and go and have all your research waiting for you on your home computer, work computer, iPhone or iPad - just the way you left it.

# Synchronize across devices

Mendeley Sync lets you synchronize your data across devices so access your research wherever you go.

## How does it work?

When you click Sync in Mendeley Desktop, your Mendeley data will be securely stored on our servers so you can access it on any machine anywhere you go. Notes in groups will also be available to others after clicking Sync.

# Synchronize across devices

Mendeley Sync lets you synchronize your data across devices so access your research wherever you go.

---

## Where's all my data?

Your data is safely stored on Mendeley's servers. Mendeley will never publish private or personally identifiable data. No one will ever know what you are currently researching or reading, unless you explicitly decide to share this data with other researchers.

You can see our [privacy terms](#) for more information.

# Doing Research in Mendeley Database (Paper)

- ◉ Mendeley Database holds two types of paper
  - ◉ (1) Metadata & Abstract
    - ◉ Where you need an Open Link Resolver to access the Fulltext
    - ◉ This FullText make sure that your library subscribed.
  - ◉ (2) Open Access Paper
    - ◉ Open Access are shared by the Open Access Journal, themselves
    - ◉ Or share openly by the owner of the paper (himself)
    - ◉ Thus, do look for the Open Access Icon

# Mendeley Suggest

**Mendeley Suggest**

**Mendeley Suggest** is the most advanced filter for academic literature we've built yet. It suggests new papers based on your library and what similar researchers are reading.

## How to improve your suggestions

**Accept & remove suggestions**  
Accept the things that you find interesting, remove things that are irrelevant, and Mendeley Suggest will learn from your actions.

**Add more papers to your library**

- [Add PDFs](#) from your hard drive
- [Import from the web](#) using our web importer
- [Search for papers](#) in our extensive online catalog

**Maintain a clean library**  
We find similarities between users based on the metadata of items in your library. Ensuring that the core metadata such as title, abstract, authors, and year, are filled in for as many papers as you can, you increase the chances of us finding suggestions.

# Literature Search

- To search your existing collection of research, you'd use Mendeley Desktop, but to search for new research in Mendeley's catalog, you would go to the website.
- With the latest release, you'll see a new section in the folder tree in the left pane. Where there was previously a division between My Library and Groups, there's now a new section for discovery tools, hosting a literature search tool and Mendeley Suggest, our research recommendation service which learns about your academic interests and recommends new research specifically for you. –
- See more at: <http://blog.mendeley.com/progress-update/new-release-literature-search-from-within-mendeley-desktop/#sthash.CHj4vcln.dpuf>

The screenshot displays the Mendeley Literature Search interface. The left pane shows a search results list with the following items:

- Open access movement in science and research
- Open access movement in science and research
- Study on the models of open access resources
- The optimal and the inevitable outcome for research in the online age
- "Predatory" open access scholarly publishers
- The optimal and the inevitable outcome for research in the online age

- Philosophy of Escanismic in the Open Access World: Stubvinn Author-Pay Model

The right pane shows the details for the selected item, "Open access journal publication: Methods of implementation and copyright issues" by M. J. Smith. The details include:

- Type: Journal Article
- Open access journal publication: Methods of implementation and copyright issues
- Authors: M. Smith
- Journal: *Bulletin of the Society of Cartographers*
- Year: 2005
- Volume: 39
- Issue:
- Pages: 21-24
- Abstract: Open access journal publication is becoming an increasingly important model for the dissemination of research articles. In the UK this is currently being driven by government requirements for access to research funded by the research councils. Within the context of cartography, the Journal of Maps publishes maps using an open access methodology. This article describes the context for open access publishing and how this model has been adopted by the Journal of Maps. Particular focus is given to the for-profit model adopted for open access distribution and the implications to the higher education community in the UK in the use of third party data...

### Groups

**Mendeley/Swets Institutional Group**

Mendeley and Swets have partnered to develop the Mendeley Institutional Edition Powered by Swets - a module built on top of the Mendeley platform, which helps librarians and other administrators to monitor the research activity within their community and to facilitate collaboration within it.

807 members joined

**altmetrics**

The aim of this group is to discuss new approaches to the assessment of scholarly impact based on new metrics. altmetrics go beyond traditional citation-based indicators as well as raw usage factors (such as downloads or click-through rates) in that they focus on readership, diffusion and reuse indicators that can be tracked via blogs, social media, peer production systems, collaborative annotation tools (including social bookmarking and reference management services).

57 members joined

**Future of Science**

An open group to collect and discuss articles around the future of science, peer review, open access, and science 2.0 / 3.0 ideas.

52 members joined

**Creatively named research papers**

Research papers with bombastic or interesting titles that will make you lol.

46 members joined

**@MyOpenArchive**

Welcome! This public group aims to discuss and share about Open Access and Institutional Repository for the future. You can join and tell us what is in your mind! Feel free to share and improving our Open Archive community. MyOpenArchive is an "individual" rather than "institutional" Open Access Repository. <http://myopenarchive.org/>

# MENDELEY

## For Students & Researchers

Complete reference manager

Content search & discovery

Read & annotate articles

Receive personal recommendations

Add files & organize

Share & collaborate with peers

# MENDELEY

INSTITUTIONAL EDITION POWERED BY **SWETS**

## For Libraries

Monitor usage & research trends

Track your members publications

See the reach of your publications

Link to your e-resources

Reports on collaboration activities

Ease usage of your citation style

**The Benefit**

# Institutions that has adopted MIE

VTT Technical Research Centre of Finland

Harvard-Smithsonian Center for Astrophysics

University of Nevada, Reno

# In a glimpse ...

## For students & researchers

- A complete reference manager
- A personal library & platform for collaboration
- A social discovery engine for academic content, research groups and peers
- A “promotion” channel for authored publications and research projects
- A free upgrade to the premium version

## For libraries

- A content access channel designed to increase usage
- Quantitative and qualitative information on researcher activities and content consumption within the institution
- A chance to adopt to the way students & researchers using the internet today
- An opportunity to positively influence the image of the library across ALL students and researchers

## Establishing a Digital Workflow for ACADEMIC RESEARCH

Using Dropox, Mendely, & an iPad.

Finding a method to organize articles and other resources is extremely important for academic research. Follow these four steps to set up a simple and effective system.

**MENDELEY**

INSTITUTIONAL EDITION POWERED BY SWETS

Connecting users and libraries to empower research

Mendely Institutional Edition (MIE) is an analytics tool built on top of Mendely's end user research platform that helps librarians, research directors and other admins to understand and monitor the research activity and scholarly output of their community and to facilitate collaboration within it.

### SETTING NEW STANDARDS IN RESEARCH COLLABORATION

Use intuitive online dashboards to easily monitor, guide and facilitate the research undertaken across your institution

Connect your institution's library and its collections directly to researchers

Track trends in research consumption and production across your institution

### MONITOR REAL-TIME ANALYTICS ON THE USE OF INFORMATION ACROSS YOUR INSTITUTION

Reading

Publishing

Impact

Social

For more information, contact your Swets representative or visit our website

[www.swets.com/mendely](http://www.swets.com/mendely)

Provide end users with Mendely's cross-platform research management tool that helps researchers manage and annotate their scientific paper collections.

### Organize. Collaborate. Discover

#### Reference Manager

Generate citations and bibliographies in Microsoft Word, OpenOffice and LaTeX.  
Read and Annotate  
Open PDFs and capture your thoughts through sticky notes and highlights.  
Backup, Sync and Mobile  
Access your papers on the web, mobile or tablet.

#### Add and Organize

Import and organize PDFs from your computer, EndNote, Papers or Zotero.  
Collaborate  
Connect with colleagues and securely share your papers, notes and annotations.  
Network and Discover  
Discover papers, people and public groups.

Brought to you by
